TWENTY-SEVENTH CONVENTION

---

VOLUME II  
**Question Box *and* Wrinkles**

BOSTON, MASSACHUSETTS  
May 24th, 25th, 26th, 1904

---

PUBLISHED BY ORDER OF THE EXECUTIVE COMMITTEE

---

NEW YORK  
THE JAMES KEMPSTER PRINTING COMPANY  
117-119-121 LIBERTY STREET

---

1904

## INDEX TO WRINKLES

| NUMBER  | PAGE |
|---|------|
| 1 Circle Diagrams for Keeping Track of the Economical Working of Men and Apparatus—R. Grieves.....  | 3    |
| 2 Truing Engine Pins—A. Gartley.....  | 7    |
| 3 A Scheme to Prevent the Oil from Being Thrown from a Dynamo Bearing—C. G. Knode.....  | 8    |
| 4 A Feed-water Heater on a Gas-engine Exhaust—F. M. Richards..  | 9    |
| 5 Signal Device for Circuit-breakers of Switchboards—G. Wilbur Hubley....   | 10   |
| 6 Running Alternators in Parallel—A. Gartley.....   | 10   |
| 7 Running Dynamos as Motors in Case of Breakdown of Engine—Wm. Gallaher.....  | 12   |
| 8 A Home-made Traveling Crane—B. C. Adams.....  | 12   |
| 9 Economic Arrangement of Alternating-current Series Arc Lighting Apparatus to Economize Floor Space—H. Schreiber.....  | 14   |
| 10 Switchboard Located to Facilitate Careful Watching Where One Man Operates the Plant—W. A. Thomas.....  | 16   |
| 11 An Electric Bell Used as an Alarm to Tell Where a Circuit-breaker Is Open—Jas. Dahles.....   | 16   |
| 12 An Electric Siren Used in the Place of Telephone Bell—F. G. Proutt.....  | 16   |
| 13 A Tool for Cutting Out a Boiler Tube from a Water-proof Boiler—A. J. Goddard.....  | 18   |
| 14 To Change the Diameter of a Dynamo Pulley by a Small Amount When Necessary to Obtain Exact Synchronous Speed of Alternators for Operation in Parallel—W. E. Emery..... | 19   |
| 15 Repairing a Defective Boiler Crown Sheet—D. L. Davis.....  | 20   |
| 16 Keeping a Commutator in Good Shape Without Turning or Sandpapering—D. L. Davis.....  | 20   |
| 17 Arrangement of Oil-tank Valves, Etc., for Oiling High-speed Engines—E. C. Ward.....  | 21   |
| 18 Tank for Collecting and Separating the Drip from the Stuffing Boxes of an Engine—E. C. Ward.....   | 22   |
| 19 A Winding Machine—Wm. J. Hugo.....   | 23   |
| 20 Plugging a Small Break or Leak in a Steam Main While It Is Under Pressure—Geo. B. Lauder.....  | 24   |
| 21 An Arrangement to Utilize Transformer-cooling Water for Boiler-feed Water—Geo. B. Tripp.....   | 24   |
| 22 A Gas-engine Igniter—A. M. Jones.....  | 26   |
| 23 A Tell-tale Lamp Used to Keep Down the Expense of Current Used by the Company in Station Lighting—L. G. White.....   | 27   |

| NUMBER |  | PAGE |
|--------|--|------|
| 24     | Transformer Booster—Geo. B. Tripp.....   | 28   |
| 25     | Home-made Oil-cooled Transformers—O. B. Kohl.....  | 28   |
| 26     | To Run a Circuit of 9.6-Ampere Lamps and a Circuit of 6.6-Ampere Lamps on the Same Machine—Jas. Dahles.....  | 29   |
| 27     | A Serious Trouble and an Efficient Remedy—B. F. Cresson.....   | 30   |
| 28     | A Floating Battery Used as a Water-wheel Governor—B. F. Cresson .....  | 30   |
| 29     | Means for Obtaining Steady Current for Checking Current Instruments—C. R. Brown.....   | 31   |
| 30     | Device to Get Reliable Records as to Load Curves, Etc., at Power Plants—H. Schreiber.....  | 32   |
| 31     | Device for Opening Alternating-current Circuits—H. Schreiber..   | 33   |
| 32     | Running an Alternator with Two Coils Burned Out—D. L. Davis  | 33   |
| 33     | A Scheme to Reduce Stand-by Losses During Light Load—A. W. Zahn.....   | 34   |
| 34     | A Home-made Traveling Crane—S. S. Ingman.....  | 34   |
| 35     | A Simple Apparatus and Method for Measuring the Water Evaporated When Making Evaporation Tests of Fuel, Boilers, Etc.—Wm. R. Gardener.....                                       | 35   |
| 36     | Connections for Making Use of Two Transformers to Their Full Capacity When Two Sets Are Connected Y to the Same Primary When One Transformer of One Set Burns Out—H. C. Hoagland | 37   |
| 37     | Re 125-Light Brush Arc Machine—S. R. Inch.....   | 38   |
| 38     | Three Individual Properties Interconnected and General Arrangement to Secure Good Service—W. L. Mulligan.....  | 38   |
| 39     | Line Transformer Used to Boost or Depress the Feeder Voltage to Help Out Temporarily—N. F. Wilcox.....   | 40   |
| 40     | Booster Transformer Used to Compensate for Drop in Line Voltage—Columbus (Kansas) Electric Company .....   | 40   |
| 41     | Potential Booster—E. H. Mather.....  | 41   |
| 42     | Transformer Testing Set for Line Use—G. Wilbur Hubley.....   | 42   |
| 43     | A Method of Maintaining Convenient and Accurate Record of Distributing Pole Lines—G. W. Faller.....  | 44   |
| 44     | A Method of Cutting in Ammeters for Testing Wattmeters in Place Without Interrupting the Service—F. Cutcheon.....  | 45   |
| 45     | Description of Alternating-current Pilot Lamp on Direct current Arc Switchboard for Promptly Detecting Open or Grounded Circuits—J. Chas. Ross .....                             | 47   |
| 46     | Locating Breaks in Series Arc Circuits—Old Colony Street Railway Company.....  | 48   |
| 47     | Reducing Transformer Core Losses—E. J. Richards.....   | 49   |
| 48     | Improvements in Self-cooling Transformers—A. A. Dion.....  | 50   |
| 49     | A Pole Puller—L. E. Watson.....  | 51   |

| NUMBER |   | PAGE |
|--------|---|------|
| 50     | Cutting Down Outages on Arc Circuits—E. S. King.....  | 51   |
| 51     | Portable Load for Testing Alternating-current Recording Wattmeters Without Removing the Meter—J. N. Bissell.....  | 52   |
| 52     | Testing Out Series Arc Circuits—C. J. Sullivan.....   | 54   |
| 53     | A Wrinkle to Prevent Burnouts of Arc Lamps, Motors and Fans, Where Direct and Alternating Current Are Substituted One for the Other—P. H. Korst.....  | 54   |
| 54     | A Practical and Inexpensive Scheme to Prevent Open-arc Circuits—R. P. Stevens.....  | 55   |
| 55     | An Ounce of Prevention Worth a Pound of Cure—W. A. Thomas   | 55   |
| 56     | Money Saved by a Wholesale Renewal of Lamps During Peak Load—Madison Gas and Electric Company.....  | 56   |
| 57     | Storage Batteries for Testing 500-Volt Direct-current Power Meters—Boston Edison Company.....   | 57   |
| 58     | Special Transformer for Testing Alternating-current Power Meters—Boston Edison Company.....   | 58   |
| 59     | Dummy Plug or Wire for Thomson Recording Wattmeter—Boston Edison Company.....   | 58   |
| 60     | A Trouble Transformer—W. J. Hugo.....   | 59   |
| 61     | A Line Ammeter—C. W. Humphrey.....  | 60   |
| 62     | A Coupler for Transformer Connections—A. G. Sangster.....   | 61   |
| 63     | Method of Furnishing Light for Substations in a Railway Plant After the Railway Is Shut Down for the Night—J. S. Whitaker   | 62   |
| 64     | Connecting Two-wire Thomson-Houston Meter in Two-wire Circuit—Which Is a Pair of Three-wire Systems with Grounded Neutral—Robert Lindsay.....   | 63   |
| 65     | A Simple Method for Determining the Demand Upon Individual Transformers—Geo. S. Haley.....  | 63   |
| 66     | Method of Showing Difference Between New and Old Incandescent Lamps—E. H. Mather.....   | 65   |
| 67     | A Method of Testing Arc Systems for Open Circuits—E. H. Mather.....   | 66   |
| 68     | A Construction of Cross-arming Whereby Service Connections Can Be Tapped from Any Feeder and Run in Any Direction from Vertical to Perpendicular and Irrespective of Sidewise Direction—Geo. Cushman..... | 68   |
| 69     | A Method of Dead-ending Heavy Feeders—J. S. Ruley .....   | 68   |
| 70     | An Effective Telephone Gong—Geo. Cushman.....   | 70   |
| 71     | A Handy Method of Determining Side of Three-wire System on Which a Two-wire Meter Loop Is Attached—G. W. Faller.....  | 72   |
| 72     | A Testing Device—W. J. Hugo.....  | 73   |
| 73     | Arrangement for Series Arc Circuits—Geo. B. Lauder.....   | 73   |
| 74     | Stringing Several Wires on One Cross-arm—Geo. B. Lauder.....  | 74   |
| 75     | Method of Fire-proofing High-tension Cables in Manholes—W. G. Carlton.....  | 74   |

| NUMBER |   | PAGE |
|--------|---|------|
| 76     | An Ingenious Arrangement of Available Generators to Help Out of a Difficulty—Cabot Stephens.....                  | 75   |
| 77     | Recording Voltmeter for Testing—Fulton County Gas and Electric Company.....                                       | 77   |
| 78     | Portable Telephone—Fulton County Gas and Electric Company..   | 77   |
| 79     | A Trouble Preventer—Ralph D. Smith.....   | 79   |
| 80     | Testing Set for Low-tension Cables—C. R. Brown.....   | 79   |
| 81     | Gin Pole for Hoisting Transformer—W. B. Voth.....   | 80   |
| 82     | A Water Rheostat Used as a Starting Box—W. J. Hugo.....   | 83   |
| 83     | Method of Connecting Thomson Recording Wattmeters on a Three-wire Edison System—Jas. E. Pyle and R. L. Peterman.. | 83   |
| 84     | Method Adopted for Keeping Ropes Tight in Connection With Cross Suspension for Arc Lamps—S. R. Inch.....          | 85   |
| 85     | A Special Transformer Used for Thawing Frozen Water Pipes—H. A. Fee.....  | 86   |
| 86     | A Wrinkle for Thawing Water Pipes by Electricity—Edward S Goldthwaite.....  | 87   |
| 87     | A Novel Electric Sign—Anonymous.....  | 89   |
| 88     | Electric Fans for Keeping Windows Free from Frost—L. Bemis..  | 90   |
| 89     | A Handy Tool for the Dynamo-room—T. Crawford.....   | 90   |
| 90     | A Made-over Electric Sign—W. Davis .....  | 91   |
| 91     | Dummy Slips to Insure the Performance of Work Ordered—E. L. Wells, Jr.....  | 91   |
| 92     | A New Business Proposition—C. G. Knode.....   | 93   |
| 93     | A Scheme for Cutting Off the Neck of a Bottle at a Predetermined Point—C. G. Knode.....                           | 93   |
| 94     | A Wrinkle Remover—Chas. H. Peters.....  | 94   |
| 95     | A Strong Argument Used to Force the Settlement of a Bill—L. Strong .....  | 94   |
| 96     | Several Wrinkles from Different Departments of the Boston Edison Company.....                                     | 95   |
| 97     | General Use of Electric Elevators in Modern Office Buildings—Edison Electric Illuminating Company of Boston.....  | 97   |
| 98     | A Help to the Complaint Department—R. N. Robins.....  | 98   |
| 99     | Thawing Water Pipes by Electricity—A. G. Sangster.....  | 100  |
| 100    | Meter Card—S. S. Ingman.....  | 101  |
| 101    | A Handy Magneto Arrangement—John Corscot, Jr.....   | 103  |
| 102    | A Ventilating Device—John Corscot, Jr.....  | 104  |
| 103    | Data Pertaining to the Electrical Process of Thawing Water Services—Geo. S. Haley.....                            | 104  |

## INDEX TO ADVERTISERS

|  | PAGE    |
|--|---------|
| Condenser Company . . . . .                                | lxiv    |
| W. M. Anderson Manufacturing Company . . . . .             | lxxix   |
| Washburn & Moens Company . . . . .                         | lii     |
| Circular Loom Company . . . . .                            | lvii    |
| Insulated Wire and Cable Company . . . . .                 | li      |
| Electric Manufacturing Company . . . . .                   | liii    |
